

## Perennial Ryegrass

# Palo Verde

Product Sheet

### CHARACTERISTICS

Palo Verde Perennial Ryegrass variety was selected from the best plants of Ecologic Perennial Ryegrass variety in large space plant nurseries on the basis of color, upright growth habit, tillering rate and disease resistance.

Palo Verde was especially developed for overseeding of winter dormant, warm season grasses. Its exceptional dark green color, density, fine texture and erect growth habit, resulting in excellent mowing quality, make Palo Verde the ideal choice for golf courses, commercial landscapes, athletic fields and home lawns.

Palo Verde...setting the standard for quality and performance.

### SEEDING RATE

Permanent Turf: 7-8 lbs./1,000 sq. ft.  
Overseeding Turf: 12-15 lbs./1,000 sq. ft.

### BENEFITS

- Exceptional dark green color
- Good mowing quality
- Dense and fine textured
- Leaf spot and rust resistance
- Performs well in low maintenance situations
