

Turf Type Perennial Ryegrass

Priority

Product Sheet

CHARACTERISTICS

Priority has strong seedling vigor and an attractive dark green color. Its excellent turf quality is evident throughout the year especially when the temperatures and humidity increase during July and August in the Mid-Atlantic region.

Priority is an upright growing type plant that mows well and maintains a dense, fine leaved turf throughout the growing season. **Priority** is endophyte enhanced for resistance to stress caused by specific insect pests.

Priority is a high yielding variety that will enhance any turf situation.

SEEDING RATE

Permanent Turf: 7-8 lbs./1,000 square feet
Overseeding: 20 - 25 lbs./1,000 square feet

BENEFITS

- Excellent Density
- Excellent Mowing Quality
- Dark Green Color
- Endophyte Enhanced
