

# Turf Type Tall Fescue

# Lexington

Product Sheet

## CHARACTERISTICS

Lexington is a member of the newest generation of traditional style of turf type tall fescue. The color and overall turf quality are so outstanding that Lexington may be seeded alone.

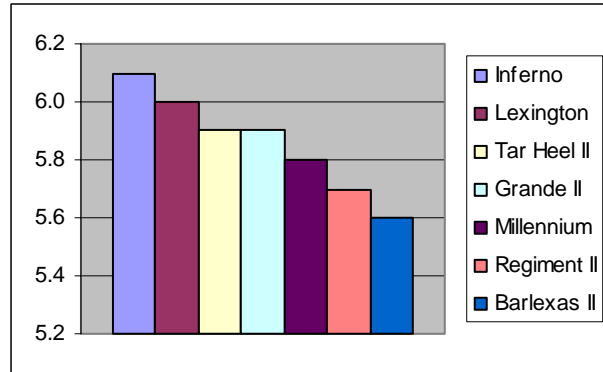

Lexington's ability to resist brown patch makes it a wonderful component for a three-way turf type tall fescue blend, or part of bluegrass and perennial ryegrass mixtures.

Lexington adapts well to the transitional zone, the Northeast and the Northwest summer-time conditions. It will grow well in most soils and responds well to water and fertilizer applications.

Lexington has performed extremely well in the current NTEP trials. It is a top performer in genetic color, spring green-up and overall quality.

## TRIAL DATA

### 2001 National Tall Fescue Test 2002-05 Data

#### Summary of Turfgrass Quality

Ratings 1-9, 9=Ideal Turf

## SEEDING RATE

8-10 LBS/1,000 square feet for new establishment

4-5 LBS/1,000 square feet for overseeding

## BENEFITS

- Dark Genetic Color
- Early Spring Green-Up
- Excellent Summer Stress Tolerance
- Good Brown Patch Resistance
