Establishment

TourPro quickly produces an elegant, low growing turf with a medium fine-leaf surface that is durable. It was rated #1 in Turf Quality in the 2015 NTEP Traffic Stress Trial.

TourPro has shown superior disease resistance to Dollar Spot and Pink Snow Mold. TourPro has high shoot density and great density during the growing season which helps crowd out and control poa annua.

TourPro was rated #2 in the 2015 NTEP drought stress trial. Using drought tolerant turfgrass varieties like TourPro allows turf managers to conserve water usage. With early spring greenup, TourPro is ready for rounds come spring. TourPro is highly recommended for use on putting greens and wherever a high performing, fine-textured and disease resistant surface is desired.

Benefits

- Produces a very high quality, medium dark green playing surface
- Resilient and durable
- Competitive crowds-out Poa annua
- Excellent seedling vigor
- Highly rated for dollar spot resistance
