Winterlinks is a newer generation dark green cultivar that more closely complements the color of perennial ryegrass and creeping bentgrass.

Winterlinks exhibits excellent overall turf quality with dark green color, fine leaf texture, medium to early maturity, and low growth habit. Winterlinks has moderate resistance to Brown Patch, Stem Rust, Powdery Mildew and Red Thread.

Winterlinks performs well in cold temperatures and shade. It's close mowing tolerance and upright growth habit makes it ideal for overseeding on golf course greens.

Benefits

- Tolerates Close Mowing
- Very Dark Green Color
- Fine Leaf Texture
- Good Overall Disease Resistance
- Excellent for Cold, Wet Conditions

Seeding Rates

Southern Overseeded Greens:	20-40lbs/ 1,000 square feet
Southern Overseeded Fairways:	10-20lbs/ 1,000 square feet
Northern Permanent Turf Areas:	2-3lbs/ 1,000 square feet
