Quasar Perennial Ryegrass offers a total package of attributes resulting in superior overall turf quality and performance. Quasar has excellent grey leaf spot resistance in addition to stem and leaf rust resistance. Quasar is heat tolerant and possesses high levels of endophyte. These attributes support Quasar's long-term persistence in a wide range of conditions. Not be overlooked is Quasar's establishment, density and traffic tolerance performance.

Quasar was entered in the 2022 National Perennial Ryegrass Overseeding Trial in the Coachella Valley of California, earning a top five(5) overall ranking out of 85 entries. The ranking was based on turfgrass quality, genetic color, dark green color index (DGCI) and uniformity.

Quasar's complete package of attributes make it an ideal choice for permanent turf applications as a single variety or a component of turfgrass blends and mixtures. With its' superior performance in the National Perennial Ryegrass Overseeding trial it is great choice for overseeding dormant bermudagrass fairways, tees and roughs. It is also an excellent overseeding option for home lawns, commercial properties, sports fields and parks.

Benefits

- Superior Overall Turf Quality
- Disease Tolerance
- Grey Leaf Spot Resistance
- Density
- Heat Tolerant
- Wear and Traffic Tolerance

Seeding Rates

Permanent Turf	7-8 lbs/1,000 sq ft
Overseeding	3-4 lbs/1,000 sq ft
Overseeding Warm Season Turf	10-20 lbs/1,000 sq ft
