Greenback Perennial Ryegrass is derived from several of the darkest green varieties on the market including Prominent Perennial Ryegrass. It achieved excellent ratings for dark green color index (DGCI) and uniformity in the 2022 National Perennial Ryegrass Overseeding Trial in the Coachella Valley of California.

In addition to its' dark color, Greenback exhibits a fine leaf texture, with superior overall turf quality, density and uniformity. It also exhibits good resistance to winter foliar diseases and is a very good winter performer. These traits resulted in a Top 20 overall ranking in the 2022 National Perennial Ryegrass Overseeding Trial.

Greenback's combination of dark color, quick establishment, fine texture and density make it the ideal choice for overseeding dormant bermudagrass fairways, tees and roughs. It is also an excellent overseeding option for home lawns, commercial properties, sports fields and parks. Greenback can be used in permanent turf applications as a component of blends and mixtures as well.

Benefits

- Dark Green Color
- Quick Establishment
- Fine Leaf Texture
- Uniform and Dense
- Excellent Mowability

Seeding Rates

Permanent Turf	7-8 lbs/1,000 sq ft
Overseeding	3-4 lbs/1,000 sq ft
Overseeding Warm Season Turf	10-20 lbs/1,000 sq ft
